

SARTORIUS

Sartolab[®] RF

Save up to 35% Sartolab[®] Vacuum Filtration Units

Sartolab[®] RF vacuum filtration units are convenient filtration units designed for research purposes. For the filtration of small volumes from 50 mL to 1 L. Sartolab[®] RF is a complete system that includes a filtration funnel and receiver flask.

Sartolab[®] RF was designed to be a stand alone unit or used in conjunction with the Sartolab[®] Multistation. A stand uniquely designed to hold one to six vacuum filtration units, allowing simultaneous filtration of up to six samples. Easily install your vacuum filtration units in the Multistation for quick and easy filtration without the need for extra connectors and time-consuming stabilization.

Special Offer

Special Offer!

Save Up to 35% on Sartolab® Vacuum Filtration Units

- Highest flow rates with a large filtration area
- No loss of protein with a low protein affinity membrane
- Low hold-up volume due to an optimized membrane support
- Can be used as stand-alone system or with the Sartolab® Multistation, which allows parallel filtration of up to 6 samples

Special offer valid only for the US until December 31st, 2023 and cannot be combined with other offer.

Cat. No.	Description	List Price
SDLC01	Sartolab® MultiStation for the filtration of up to 6 samples in parallel	\$3,480.00

Speed up your clarification with Sartolab® Multistation

- One single vacuum source to enable the filtration of up to 6 samples at the same time
- Hands-free filtration
- Time saving (no extra installation time to vacuum for each single filter unit)
